

Offers comprehensive medical, nursing, and healthcare services

The SECOM Medical System is a family of clinics, hospitals and their subsidiary healthcare facilities widely distributed in Japan from Hokkaido in the north to Kobe in the west, in that New Tokyo Hospital plays a flagship role.

The SECOM Medical System is a member of the SECOM Group that started as a home and business security company in 1962, and has now grown to a world-wide conglomerate of 195 group companies with a total number of employees of 49,000. The mission of the SECOM Group is to create a society free of anxiety, protecting customers' lives and property by building a Social System Industry.

The SECOM Medical System offers a full spectrum of healthcare options, including medical services, health maintenance and disease prevention, nursing homes and long-term care facilities, hospital management, medical personnel recruiting, medical information technology services and home care services to name a few.
